

YEAR ROUND IMMUNE SUPPORT

Winter - Spring - Summer - Autumn

The world's most exciting new herbal supplement now recognised as nature's own antibiotic!

Olive Leaf Extract is an effective, all natural and non toxic scientific break through, which has proven to be efficacious using its powerfull active ingredients.

How does Olive Leaf Extract Work?

We have amazing immune systems to protect us from billions of pathogenic (disease/causing) organisms entering our bodies when breathing, food & drink & skin cuts. With peak immune function, micro-organisms can be present but have little effect. Olive Leaf Extract (OLE) boosts a compromised immune system, preventing pathogens from reproducing more microbes. Often increased energy results as your body is free from fighting opportunistic germs & your energy can be redirected how you please!

Why you may need Olive Leaf Extract?

Many diseases are due to hidden infections. Naturamedics Olive Leaf Extract, a potent anti-microbial, anti-bacterial, anti-oxidant, anti-fungal, immune boosting formula addresses these hidden infections.

Olive leaf contains oleuropein, a compound that plays a role in supporting a healthy immune system. It has been shown in traditional usage to assist in the relief of the symptoms of a fever as well as a tonic for good health and well-being. Traditionally Olive leaf has been used for its antibiotic properties as well as assisting in the relief of cold and flu symptoms. Olimmune is a strong antioxidant that can assist with supporting against free radical damage as well as assist in wellbeing and a healthy immune system.
